COPPER TO TAKE SOUTH UTAH GIVES PLACE OF STEEL

Red Metal Becoming Barometer by Which Business Condition Is Gauged.

UNLIMITED USES

FOR METAL CERTAIN

Present Generation Will See Wide Electrification of World's Railroads.

"Copper is becoming the principal ba rometer of business conditions, supplanting steel in this particular, owing to the important part the metal is to play in the extensive electrification of railroads." said James G. Berryhall, one of the most

said James G. Berryhall, one of the most prominent bankers and business men of lows. Who was in Salt Lake City on Tuesday. Continuing he said:

"The low price of copper has led to a great increase in the consumption, and the consumption of the metal in the future. If authorities are to be believed, is to be practically without limit. Edison recently said that within a very few years, and certainly within our fime, all the railroads of the world will be electrified.

Is Ideal Conductor.

Is Ideal Conductor.

Ts Ideal Conductor.

"This involves an almost indefinite expansion in the uses of copper. The metal is the best practical conductor known and it is absolutely indispensable in the manufacture of dynamos and motors. General business conditions are good and copper conditions have not been so very unsatisfactory, but there is room for great expansion and copper will profit by improved industrial conditions.

"I do not look for any very material increase in the price of copper during 1911. It may reach as high as 13 cents a pound, and it certainly cannot go below 12 cents for any length of time. Should the price drop to 11 cents, one-third of the copper producers would be compelled to cease operations. Should the metal touch 10 cents, two-thirds of the production would be thrown out, and the result would be increased prices."

Smelter Improvements.

Smelter Improvements.

Smelter Improvements.

In addition to being optimistic over the situation, Mr. Berryhill, who is a close student of metal and mining affairs, and one of the Nevada Douglas Copper company's directors, believes there will be a tremendous improvement in smelting within the next few years. One hig step in advance which he mentions is the Baggaley system of primary conversion, by which concentrates are reduced to blister copper by their own fuel without being bandled by converters. The extension of this process will reduce smelting charges to the minimum.

SOME RECORD-BREAKING DISCOVERIES OF NUGGETS

The following from the Mining and Scientific Press gives some idea as to the value of gold nugrets, or "beans," as the Alaskan would call them.

The largest mass of gold ever found free from quartz, of which there is any record, was that taken out of the Byer & Haltman mine, Hill End, N. S. W. May 16, 1872. It was embedded in blue slate 250 feet from the surface. It weighed 540 pounds and was 57 inches long, 38 inches wide, and averaged 4 inches thick. It was valued at \$148,800. The Welcome Stranger nugget was found on Mt. Molingel, Australia, February 9, 1889. It weighed 150 pounds, and was valued at \$45,000. The Welcome nugget was found at Bakery Hill, Australia, June 2, 1859. It weighed 184 pounds 9 ounces, and was valued at \$44,556.

The nugget found August 18, 1899, in the Monumental quartz mine, twelve miles north of Downleville, Sierra county, California, was the largest piece of gold ever found in the state up to that date. It weighed 1142,25 ounces, or 955 pounds, cleaned, and was weeker was discounted by section was found in decomposed quartz 25 feet

ONLY ONE WAY FOR COPPERS TO GO NOW

COPPERS TO GO NOW

James A. Pollock & Co., bankers and brokers, 325-235 South Main street, furnish the following, received over their private wire vesterday afternoon:

Paine, Webber & Co., leiter, Boston. Very few orders accumulated over the holidays and the majority of that list remained unchanged. Lake sold at 373 at the opening, but later reacted to 37. East Butte was 12 bid at the opening, and later sagged off 4. It is simply a waiting market, but there is no danger in buying coppers at the present prices, as both the metal and the stocks have been liquidated to a standstill, and the only way they can change is to rally.

Logan & Bryan stock letter, New York. An accumulation of buying orders over the holiday and a slightly higher range of London quotations, together with the absence of unfavorable dovelopments, served to impart a rather firm tone to the stock market during the first few hours of today's session. The upward movement was led by the Gould issues and also Canadian Pacific and Soo, but it became apparent as prices advanced that offerings were being supplied quite freely with the result that a recession occurred in the last liour. The fact that the supreme court reconvenes on February 20, and that decisions in the freight rate cases and Union Pacific merger suit are expected daily, has demenyed toward causing traders generally to lighten accounts. It still appears that strong interests are arrayed on the conservative side, but it strikes us that the majority were a fraction below opening.

Gallagher, New York: The Tintic stocks showed strength here today, but only few sales. Balance of market, both in coppers and industrials, absolutely dead and without feature. Closing prices in the majority were a fraction below opening.

Hornblower letter, Boston: Market dull and uninteresting. Demand was light, and on the other hand there were few stocks offered. Changes were fractional each way. There seems to be little in sight at present, other than a narrow traders' market, but it is the feeling of those

SILVER ROUTE CHANGED BY MEXICAN DISTURBANCES

EXPORT FIGURES EXPLAINED

WALL STREET BENUMBED FOLLOWING HOLIDAY

James A. Pollock & Co., bankers and brokers, 223-235 South Main street, furnish the following, received over their private wire yesterday afternoon.

New York Sun says: Wall street seemed to be more or less benumbed after its holiday. Dealings were desuitory and the list generally dull. Trading, for the most part, continued dull, and emphasized the characteristics which became pronounced at the end of last week, a tendency for fluctuations to become limited and for business to contract as the swing of prices narrowed. The opening was fairly active with a brave show of strength, which vanished as soon as a supply of stocks appeared. There had been no accumulation of orders, and the professional element was left to trade with itself.

Ore Shipments.

The Utah Ore Sampling company on Tuesday released 16 cars of ore from Utah, 4 from Nevada and 1 car from Cali-

Ore and Bullion.

The ore and buillon report for Tuesday, given by McCornick & Co., was as follows: Ore received, \$65,000; buillon shipped, \$60,000; total, \$125,000.

A few minutes' delay in treating some cases of croup, even the length of time it takes to go for a doctor often proves dangerous. The safest way is to keep Chamberlain's Cough Remedy in the house, and at the first indication of croup give the child a dose. Pleasant to take and always Sold by all dealer

MASON CAMP IS BEING REVIVED

Railroad and Smelter Inspire Property Owners to Get to Work Again.

DIFFERENT ASSETS

Big Mines Preparing for Production of Copper and Good Times.

Nevada Douglas Copper company, arrived in the city Tuesday from the camp of Mason, Nev., for the purpose of attending the conference of directors now on Arentz has been at Mason so long that practically all the high hulldings in Sail Lake have been exceted since his last visit here, and when seen by The Tribune exsterday he was profoundly impressed with the evident prosperity and advancement made during the past three years.

Are Resuming Work.

Are Resuming Work.

At Mason, he states, a large number of property owners are resuming the development work which the panic of 1997 stopped, and which the installation of the Nevada Copper Belt railroad line and the Mason Valley custom smelling plant have inspired on a larger scale than ever. With a market at their dumps for all the copper ore they can produce, the red metal folks of Itason have every reason now to begin digging three shifts a day.

"We have completed all our stations to the water level of the Ludwig, and we are now ready to install our pumps," he said. "Fifty-nine cars have been ordered, also the 150-horsepower electric hoist has been ordered shipped. The company will install a 160-foot trainway from the top of Douglas hill to the railroad tracks, so that this portion of the mine can provide its share of copper ore tourage for the smelter. The mins is looking fine.

Enthusiastic Over Camp.

Enthusiastic Over Camp. "There is great progress being made at the smelter site. The company has about 125 men at work. The concrete work is about 405 men at work. The concrete work is about done buildings are being hurried to completion, and it looks as if the structural steel on the main building can begin going up within two or three weeks." three weeks.
"I am more enthusiantic then ever over the Mason country. We have the mines, the railroad and smelter, and we have the farms, all which will give Mason and vicinity a degree of prosperity hard to duplicate anywhere."

COLORADO IS OPENING SOME RICH NEW ORE

Friends of the Colorado Mining company heard Tuesday that the work of probing the ore body some distance north of the Sioux lines is bringing considerable rich silver and lead carbonates to view within the main body of lower grade material. The shipments, it is said, are showing a steady improvement in value.

There is a stretch of territory north of the Sioux within the Colorado mine which, for 100 feet, may be termed virgin ground. It is within this area that the management expects to secure steady dividend material until either depth or some of the new development work under way brings another body of shipping grade rock to light.

REGULAR DIVIDEND FROM INTERNATIONAL SMELTING

The Pollock wires brought the infor-mation late Tuesday that the directors of the International Smelting & Refin-ing company has declared the regular

For Rheumatism and Nervousness

Better Than Medicine

Rheumatism. Nervousness. Neuralgia, Backache, Liver and Kidney complaints are caused by excess uric acid. Medicine can only temporarily counteract the effect, while Electropodes remove the excess uric acid, and all other poisons and inpurities, from the system. The result is prompt relief and a permanent cure.

One man from Pasadena, Cal, writes: "Electropodes cured me, in two weeks' time, after all other remedies had failed." Another from Madison, Neb., says: "Electropodes have done me more good than all the medicine I have taken."

No Cure, no Pay Druggist Signs This Contract

The purchaser of Electropodes is granted the privilege of returning them within 30 days, and the purchase price (\$1.00) is to be refunded upon the following conditions: They are to be worn according to directions for at least 25 consecutive days, and then if not satisfactory, to be returned in original box. Druggist's Signature.....

For sale in Salt Lake City by SCHRAMM-JOHNSON, "THE NEVER SUBSTITUTORS," FIVE STORES, where the cars stop. Also other good Druggists everywhere. By mall, post pald, upon receipt of \$1.00.

Western ElectropodeCo. 247 Los Angeles St., Los Angeles Cal. State whether for man or woman.

MACHINERY OF UTAH COALITION UNINJURED

Manager Strickland Looks Over the Damage of Recent Deadly Slide.

General Manager R. H. Strickland of the Utah Mines Coalition company has returned from the mine up Big Cottonwood, having completed his first inspection of the ruin wrought by the snow-slide of January 30. Several of the old nine force returned with him, and a tunnel was driven through the ice, snow and scattered timbers to the compresso

"Everything certainly looks like death and destruction," he said yesterday

and destruction," he said yesterday. "All the buildings are ruined, not only wrecked, but you can't find the majority of the pieces. The machinery, however, is unhurt. The compressor is standing on its foundation uninjured. Five of our eight mine cars are in the tunnel and ail our machine drills are in the mine unhurt.

"There is no use in trying to recover the equipment and begin operations until this weather cases up. There has been almost a continuous bilizzard up Big Cottonwood since my bast visit. It will not take us over two weeks to get things in order for work; the compressor is ready to be connected up.

The company will have to build a new boarding house, compressor bouse, assay office, blacksmith shop and stable. irding house, compressor house, assay jee, blacksmith shop and stable.

in your next order.

LEMHI COUNTY MINES SHIPPING GOOD ORES

Special to The Tribune.

SALMON CITY, Ida., Feb. 14.—Thirteen cars of one were shipped from Lemhl county, over the Gilmore & Pittsburg radicoad, one day last week. The average shipment now is about three cars daily, but during the coming summer an extra train will be required for the transportation of the ore mined along the line of this road.

The strike of one recently made in the famous old Yellow Jacket mine, near Forney, proves to be fully as good as at first reported. After making a 350-foot crosscut from one of the lower tunnels, a twenty-seven-foot vein was bisected which carries quantities of \$20 to \$30 gold-bearing ore. Superintendent Hastings is in charge of the work at this property. The rock is said to be milling rock of good values throughout. Special to The Tribune.

THREAT TO INVESTIGATE AMALGAMATED UNTIMELY

When the wires flashed the news Tuesday that the government would be asked to investigate the Amalgamated and allied interests, local followers of copper issues thought that this was a very unfortunate hour to attempt any such thing. The cast asserts that foreign speculators are short a great deal of Amalgamated who would welcome anything to bear the stock, while it is said also that there are more American stockholders in Amalgamated today than ever in the history of the organization. Fortunately the greater part of this stock is paid for, not held on margins, yet it is plain to see which side of the globe would be benefited by a slump in this Butte issue.

SILVER SHIELD BREAKS INTO SPLENDID ORE

General Manager Harry S. Joseph stated Tuesday that the Silver Shield is looking satisfactory on and a little below the Niagara tunnel level. A new ore body is being developed, the importance of which has not yet been fully determined, but assays on from five to six feet of ore, within which is some fine shipping material, give the following results: Lead, 19 per cent; silver, seven ounces: copper, 0.5 per cent; gold, 80 cents; iron, 19 per cent, and silica. If per cent The Silver Shield management is getting to the point where big results appear logical, and this new find may be an index to better things for this Bingham organization. S Troughs

PIOCHE BRANCH WILL BE READY ON MONDAY

Mining operators of Ploche have been given to understand that the branch line into the camp from Callente will be ready for business again by Monday, and perhaps a day sooner. This intelligence has permitted many companies to place immediate orders for supplies, fuel especially, so that everything will be at Callente by the appointed time. Ploche can then jerk a few more gray hairs out and pitch into mining again.

TINTIC OPERATORS ARE INTERESTED IN RECIPROCITY

The Tintic Mine Owners' association. hrough Harry S. Joseph, has taken up he reciprocity matter with Canada as the reciprocity matter with Canada as far as lead is concerned, and copies of the proposed arrangements with our northern neighbor will be asked for. It is also probable that the Utah legislature will be called upon to memoralize congress not to include lead in the agree-

Nevadas in San Francisco. James A. Polleck & Co., bankers and brokers, furnish the following, received over their private wire yesterday after-

STOCK EXCHANGE ENJOYS BEST DAY FOR MONTHS

Tuesday was the most satisfactory day in many months on the local exchange,

in many months on the local exchange, 107,840 shares of stock selling, the market value of which was \$21,201.67.

The morning session promised for a time to climb entirely too fast, not that the various feature issues are selling for more than they are worth but this is the first upward movement since the long slump, and no sudden or top-heavy movement can last long. The tendency doubtless is upward, but there are many resting places for the profit taker, and these should not be overlooked. Conditions are ripe for a long pull upward, but not for a boom. The day closed practically where Saturday ended.

The following were the closing unlisted and listed stock transactious:

The bearing of children is frequently followed by poor health for the mother. This supreme crisis of life finding her physical system unpre-pared for the demands of nature, leaves her with weakened resistive powers and sometimes chronic all-ments. This can be avoided if Mother's Friend is used before the coming of baby, and the healthy woman can remain a healthy mother. It is the only remedy that perfectly and thoroughly prepares the system for healthy motherhood, and brings about a natural and easy consummation of the term. Women who use Mother's Friend are always

saved much suffering when the little one arrives, and recover more quickly, as with no ill effects, or chronic troubles. Every expectant mother should safeguard her health by using Mother's Friend, thus preparing her physical condition for the hour of motherhood. This medicine is for sale at drug stores. Write for free book for expectant mothers.
